## INDUSTRIAL REMOTE ACCESS ROUTER

### Highlights

- Easy installation using customer's LAN
- Integrated WiFi, Cellular connectivity
- Firewall friendly outbound connection
- Standard ports used: 443 (HTTPS), 1194 (UDP)
- Possibility to control VPN access with external key switch
- SD card reader for easy commissioning
- USB connectivity for serial devices connectivity
- Full industrial design (24 VDC power supply, DIN rail wall mounting)

The eWON Cosy is an industrial remote access router that is designed to offer easy remote access, across the Internet, to machines and installations at customers or in the field.

With eWON Cosy, OEMs and System Integrators can troubleshoot machines, debug the PLC program, upload projects, gain remote use of an HMI or an IP camera, without going on site, drastically reducing support costs.

The eWON Cosy lets maintenance engineer establish a secure VPN connection from the machine to anywhere via Talk2M, eWON's cloud-based remote connectivity solution. The router seamlessly communicates on the local area network with the PLC and the HMI, and allows remote connection from anywhere with a simple laptop, tablet or smartphone. eWON Cosy and Talk2M make working across the Internet easy, so the user does not need to be an IT expert to take advantage of it.

### Typical Applications

- Remote access to PLC/HMI/IPC/ IP camera/...
- PLC remote maintenance
